

Volume 1 (1997)

Polyazolybenzenes and related compounds: propellene-like aromatic compounds

Rosa Maria Claramunt, José Elguero, Consuelo Escolástico, Cristina Fernández-Castaño, Concepción Foces-Foces, Antonio L. Llamas-Saiz and María Dolores Santa Maria

Hetero Diels-Alder reactions in aqueous medium

Francesco Fringuelli, Oriana Piermatti and Ferdinando Pizzo

Reactivity and tautomerism of 2-thiazoleamine derivatives

Luciano Forlani

Combinatorial models and polarity control rules in heterocyclic design

Eugene V. Babaev

Five- and six-membered heterocycles from nucleophilic addition to nitrile oxides

Giovanni Grassi and Francesco Risitano

The chemistry of trinems

Chiara Ghiron and Tino Rossi

4-Aminoquinolines. A general approach

Francisco Palacios, Domitila Aparicio, Gloria Rubiales, Ana M. Ochoa de Retana and Eduardo Martinez de Marigorta

Stereoselective synthesis of functionalized five-, six- and seven-membered heterocyclic systems via intramolecular cycloaddition of C-alkenyl nitrones and nitrile oxides

Ugo Chiacchio, Antonio Rescifina and Giovanni Romeo

Photochemical aryl-aryl coupling in furan, thiophene and pyrrole derivatives

Maurizio D'Auria

UV and photoelectron spectroscopy conformational analysis of radical cations and parent molecules of heterocyclic ring assemblies

Alexander I. Vokin and Valerii K. Turchaninov

Recent approaches to γ -lactams via C-C bond formation

Roberta Galeazzi, Giovanna Mobbili and Mario Orena

ISBN 88-86208-24-3; VII+400 pages.
