

Volume 2 (1998)

Synthesis of modified 2',3'-dideoxynucleosides as potential antiviral drugs

Antonella Converso, Carlo Siciliano and Giovanni Sindona

c-Annulated furans as building blocks in organic synthesis

Tim Traulsen and Willy Friedrichsen

Reactivity of condensed azinouracils towards nucleophiles

Anna V. Gulevskaya and Alexander F. Pozharskii

Amino acids in the synthesis of heterocycles: general aspects and recent developments

Giampaolo Giacomelli and Massimo Falorni

Use of multistep sequential reactions for the synthesis of heterocyclic compounds

Matthias Schuster, Roland Stragies and Siegfried Blechert

5-Hydroxy-4,5-dihydropyrazoles

Kirill N. Zelenin and Stanislav I. Yakimovitch

Unified approach to the photochemical isomerization of five-membered heteroaromatic compounds

Maurizio D'Auria

Application of microwave irradiation to heterocyclic chemistry

Inés Almena, José Ramon Carrillo, Pilar de la Cruz, Angel Díaz-Ortiz, María José Gómez-Escalonilla, Antonio de la Hoz, Fernando Langa, Pilar Prieto and Ana Sánchez-Migallón

Tautomerism of polyhydroxypyrimidines

Valery I. Slesarev, Alexey S. Popov and Vadim M. Okun

Recent advances in heterocyclic pesticides

Franco Bettarini and Paolo Piccardi

Synthesis of heterocyclic compounds with perfluoroalkyl groups based on internal perfluoroolefins

Georgii G. Furin

Mass spectrometry of nitroazoles

Lyudmila I. Larina, Valentin A. Lopyrev, Lyudmila V. Klyba and Vsevolod N. Bochkarev

Mass spectrometry studies of isothiazoles

Gianluca Giorgi

ISBN 88-86208-11-1; VII+400 pages.
