

Volume 3 (1999)

Synthesis of five-membered heterocycles from novel functionalized allenes

Klaus Banert

Recent applications of hydrazides and related compounds for the synthesis of heterocycles

Slovenko Polanc

Recent aspects of the synthesis of enantiopure 5-oxo-tetrahydro-3-furancarboxylic acids

Cristina Forzato, Patrizia Nitti, Giuliana Pitacco and Ennio Valentin

Birch reduction of aromatic heterocycles

Timothy J. Donohoe, Paul M. Guyo and Ali Raoof

Synthetic approaches to cocaine and its analogues

Daniele Simoni, Riccardo Rondanin and Marinella Roberti

The use of 4-hetaryliden- and 4-aryliden-5(4H)-oxazolones as dienophiles in the Diels-Alder reaction

Alberto Avenoza, Jesús H. Busto, Carlos Cativiela, Jesús M. Peregrina and María M. Zurbano

Synthesis of heterocycles by the S_{RN}1 mechanism

Roberto A. Rossi and Maria T. Baumgartner

Phosphacumulene ylids as versatile C₂-building blocks - New pathways to tetronates, coumarins and azacycles

Rainer Schobert, Jonas Löffler and Sven Siegfried

1,2,3-Thiadiazoles via the Hurd-Mori reaction. Mechanistic and synthetic aspects

Peter Stanetty, Martin Turner and Marko D. Mihovilovic

Recent applications of the isoxazole ring in medicinal chemistry

Paolo Pevarello, Raffaella Amici, Maria Gabriella Brasca, Manuela Villa and Mario Varasi

Gas-phase structural characterization of fused isothiazoles

Gianluca Giorgi and Laura Salvini

Dynamic processes in palladium and platinum complexes coordinated on scorpionate and pyrazolylazine type ligands

Felix A. Jalon, Blanca R. Manzano, Felipe Gómez-de la Torre, Ana M. Guerriero and Ana M. Rodriguez

Synthesis and reactivity of linearly fused isoquinolines and isoquinolinium salts with bridge-head nitrogen atom

György Hajós and Zsuzsanna Riedl

Energetic 1,2,4-triazoles and tetrazoles. Synthesis, structure and properties

Vladimir A. Ostrovskii, Mark S. Pevzner, Tatjana P. Kofman, Mikhail B. Shcherbinin and Igor V. Tselinskii
