

Volume 4 (2000)

Multicomponent reactions of isocyanides and the formation of heterocycle

Ivar Ugi, Birgit Werner and Alexander Dömling

Practical synthesis of (20 S)-(+)-camptothecin: the progenitor of a promising group of anticancer agent

Marco A. Ciufolini and Frank Roschangar

Chiral oxazinones and pyrazinones as α -amino acid templates

Tomás Abellán, Rafael Chinchilla, Nuria Galindo, Gabriela Guillena, Carmen Nájera and José M. Sansano

Alkyl 3-(dimethylamino)propenoates and related compounds as useful building blocks in the synthesis of heterocyclic systems. Approaches towards the synthesis of natural products and their close analogs

Branko Stanovnik and Jurij Svete

Functionalised epoxides and aziridines: reactivity with metal halides and synthetic applications

Giuliana Righi and Carlo Bonini

Chemical structure and antibacterial activity of 4-quinolones: incidence in nature, preparations and properties

V. Milata, R. M. Claramunt, J. Elguero and P. Zálupsky

Cation-dependent pericyclic reactions of photochromic crown ethers

Olga A. Fedorova and Sergey P. Gromov

Reactivity of 2-substituted chromones

Artur M. S. Silva, Diana C. G. A. Pinto and José A. S. Cavaleiro

Diazoketones as precursors in β -lactam synthesis

Joachim Podlech, Michael R. Linder and Thomas C. Maier

Ketenimines in heterocyclic synthesis

Mateo Alajarín, Ángel Vidal and Fulgencio Tovar

Structure and proton-transfer reactions in histamine

Ewa D. Raczynska, Michal K. Cyranski, Malgorzata Darowska and Tomasz Rudka

Recent advances in the oxidative functionalization of purine and pyrimidine nucleic acids

Raffaele Saladino

The facets of the heterocyclic betaine pool

Ermitas Alcalde, Immaculada Dinarès, Neus Mesquida and Lluïsa Pérez-García

Gas-phase structural characterization of isothiazole dioxides

Gianluca Giorgi and Laura Salvini

ISBN 88-86208-16-2; XVII+440 pages.
