

Volume 5 (2001)

The synthesis of (substituted-amino)azines by SNH substitutions and ring transformation reactions

Henk C. van der Plas

Stereoselective synthesis of tetrahydrofurans and tetrahydropyrans via seleniranium ions

Michelangelo Gruttadauria, Paolo Lo Meo and Renato Noto

Addition and cycloaddition reactions using α,α -unsaturated sugar 1,5-aldonolactones. Synthesis of isoxazolidines, pyrazolidines, deoxysugars and iminosugars

Margarita Jurczak, Danuta Mostowicz, Irma Panfil, Joanna Rabiczko, Dariusz Soch and Marek Chmielewski

A chiral oxazolone derived from D-glyceraldehyde as an intermediate in the synthesis of enantiomerically pure cyclic amino acids

Elena Buñuel, Ana I. Jiménez, María D. Díaz-de-Villegas and Carlos Cativiela

Stereoselective syntheses of piperidine containing heterocycles using carbohydrate auxiliaries

Gernot Zech and Horst Kunz

Furan ring opening reactions in heterocycles syntheses

Alexander V. Butin, Vladimir T. Abaev, Tat'yana A. Stroganova and Andrey V. Gutnov

Recent advances in the regio- and stereocontrolled synthesis of natural and unnatural stereodefined 5-ylidene-2(5H)-furanones

Renzo Rossi and Fabio Bellina

1,2-Oxathiole, 1,2-oxathiin, 1,2-thiazole and 1,2-thiazine derivatives with hypervalent bonds and close contacts

Dénes Szabó, Ferenc Ruff and Árpád Kucsman

Recent developments in the chemistry of 2-alkyl-2-oxazolines and 2-alkyl-2-thiazolines

Santos Fustero, Esther Salavert, Antonio Navarro, Fatemeh Mojarrad and Antonio Simón Fuentes

Synthesis and reactions of 5,6-dihydropyridin-2(1H)-ones and -thiones

Alexander S. Fisyuk and Nikolay V. Poendaev

Heterocyclizations in the sugar chemistry by utilizing push-pull activated C-C double bond

Klaus Peseke, Holger Feist and José Quincoces

Mass spectrometry of β -lactam antibiotics

Anna M. Gioacchini and Pietro Traldi

Chemical syntheses of the seven and eight-membered ulosonic acids DAH and KDO

Michel Baltas and Yvan Ruland

Recent advances in the Parham cyclization for the synthesis of heterocyclic systems

Ainhua Ardeo, María Isabel Collado, Iñaki Osante, Javier Ruiz, Nuria Sotomayor and Esther Lete

4-(Het)aryl-2,4-dioxobutanoic acids and their derivatives for the synthesis of heterocycles

Sergey G. Perevalov, Yanina V. Burgart, Victor I. Saloutin and Oleg N. Chupakhin

Cycloimmonium ylides. Structure and electrocyclization reactions

Patrice Woisel, Georgiana G. Surpateanu and Gheorghe Surpateanu

Pyrroles and indoles with phosphorylated nuclei

Ninel G. Feshchenko, Sergej P. Ivonin, Andrej A. Tolmachev and Alexandr M. Pinchuk
