

1st Italian Workshop on Astrochemistry

The main goal of the 1st Italian Workshop on Astrochemistry is to bring together astrophysicist and chemists working on observations, theoretical models, and laboratory experiments to present their recent advances, to discuss about the open questions, and to plan future collaborations.

In particular, the workshop will be focussed on four topics:

- Observations of complex organic molecules in space
- Spectroscopy and structure determination
- Modeling and experiments of complex organic molecules formation
- Kinetic and prebiotic chemistry

Informazioni **Organize by:** Scuola Normale Superiore e INAF (osservatorio di Arcetri)

Luogo: Firenze

Dal: 10 March, 2016

Al: 11 March, 2016
