

# Call for Abstracts

## C1 Building Blocks for Future Chemistry

31th Conference of the  
Petrochemistry Division of DGMK

### Date

October 11 - 13, 2023

### Venue

Dreikönigskirche,  
Dresden

### Deadline for Abstract Submission

May 2, 2023

### Download Abstract Template

[www.dgmk.de/veranstaltungen](http://www.dgmk.de/veranstaltungen)

### Topics of Keynote Lectures

- Fischer Tropsch processes
- Methanol-to-X
- Hydroformulation
- Carbonylation
- Reducing CO<sub>2</sub> footprint - technologies & processes

Organized by

The Conference is jointly organized by the DGMK Division "Petrochemistry", the Division of Industrial Chemistry of the Società Chimica Italiana (SCI) and the ÖGEW Österreichische Gesellschaft für Energiewissenschaften.

## ABOUT THE CONFERENCE

This conference brings together experts from industry and academia. A unique feature of this conference over the years is the high participation from industry, representing roughly one third of the delegates. This makes this conference an ideal platform for networking.

The conference will address topical scientific and technological issues around catalysis as an enabling technology, addressing the special challenges of the energy transition and improved sustainability.

Abstracts on both fundamental studies and applied research around the above topics will be highly welcome.

English will be the conference language throughout. The scientific program will consist of keynote lectures by renowned experts in the field (upon invitation only), oral presentations and poster presentations. There will be no parallel sessions and ample time will be allowed for discussion. The preprints with the manuscripts of keynote, oral and poster presentations will be handed out in electronic form to registered participants only at the conference desk.

## ORGANIZATION

DGMK e.V.  
Große Elbstraße 131, 22767 Hamburg  
Germany

Dr. Gesa Netzeband  
+49 40 639004 21

## GUIDELINES FOR ABSTRACT SUBMISSION

All proposals should contain the envisaged title of the paper, the authors' names and affiliations including their addresses and a concise abstract. The complete proposal should not exceed one typewritten page. Please note that we intend to provide the accepted abstracts on our homepage. We therefore kindly ask you to use the template for abstracts on our website. Please note that authors will not be exempt from paying the conference fee.

## SCIENTIFIC COMMITTEE

Dr. Michael Bender, BASF SE, Ludwigshafen

Dr. Holger Blanke, BP Europa SE, Bochum

Dr. Axel Göhr, INEOS, Köln

Dr. Harald Häger, Evonik Performance Materials GmbH, Marl

Prof. Dr.-Ing. Andreas Jess, Universität Bayreuth

Prof. Dr. Johannes A. Lercher, Technische Universität München

Dr. Mario Marchionna, Saipem S.p.A., San Donato Milanese, Italy

Prof. Dr. Jörg Sauer, KIT, Karlsruhe

Prof. Dr. Dieter Vogt, Technische Universität Dortmund
